EMYS80HSP is a refrigerator compressor model made by Embraco, a company known for manufacturing reliable and energy-efficient compressors. Here's a breakdown of the code:

- **EMYS** – Likely a designation specific to Embraco compressors
- **80** – Possibly refers to the size or power rating of the compressor (e.g., 1/4 horsepower)
- **HSP** – Could indicate specific features of the compressor, although the exact meaning depends on Embraco's coding system

Here are some key specifications you might find relevant about the EMYS80HSP compressor:

- **Refrigerant type:** R-134a
- **Voltage:** 220-240V
- **Frequency:** 50Hz
- **Oil type:** Mineral, polyolester, or alkyl benzene (depending on manufacturer)
- **Application:** Commonly used in refrigerators and freezers
