Specifications of Sharp Refrigerator:

- 1. Rated Voltage:**
 - 220-240 volts (suitable for use in most Arab countries).
- 2. Rated Frequency:**
 - 50 Hz (the standard frequency in the Arab region).
- 3. Rated Input (Power Consumption):**
 - 170-190 watts (this indicates power consumption during normal operation).
- 4. Rated Input of Heating Elements:**
 - 138-164 watts (used during the defrosting process).
- 5. Defrosting Input:**
 - 137-163 watts.
- 6. Total Gross Volume:**
 - 610 liters (this includes the entire internal space of the refrigerator and freezer).
- 7. Total Storage Volume:**
 - 577 liters (this refers to the actual usable space).
- 8. Climate Class:**
 - T (this means the refrigerator is designed to operate in ambient temperatures up to 43°C, making it suitable for hot regions).
- 9. Refrigerant Type:**
 - HFC-134a (a commonly used and environmentally friendly refrigerant).
- 10. Mass of Refrigerant:**
 - 130 grams.
- 11. Net Weight:**

- 88 kilograms.
12. **Serial Number:**
- 009,V (used for identification when contacting customer service).

Important Notes:

- **Energy Efficiency:** The power consumption ranges between **170-190 watts**, making this refrigerator relatively energy-efficient.
- **Large Capacity:** The large storage capacity (**577 liters**) makes it suitable for large families.
- **Suitable for Hot Climates:** The T climate class means it operates efficiently in high-temperature regions.
- **Environmentally Friendly:** The use of **HFC-134a** refrigerant reduces environmental impact compared to traditional refrigerants.

Tips for Optimal Use:

Regularly clean the condenser (located at the back of the refrigerator) to ensure cooling efficiency.

Ensure adequate space around the refrigerator for proper ventilation.

Set the temperature to **4°C for the refrigerator** and **-18°C for the freezer** to keep food fresh while saving energy.
