A red exclamation point and an “E4” code appears and flashes and the freezer is on and cooling properly

Solution

Hello

Before any intervention:

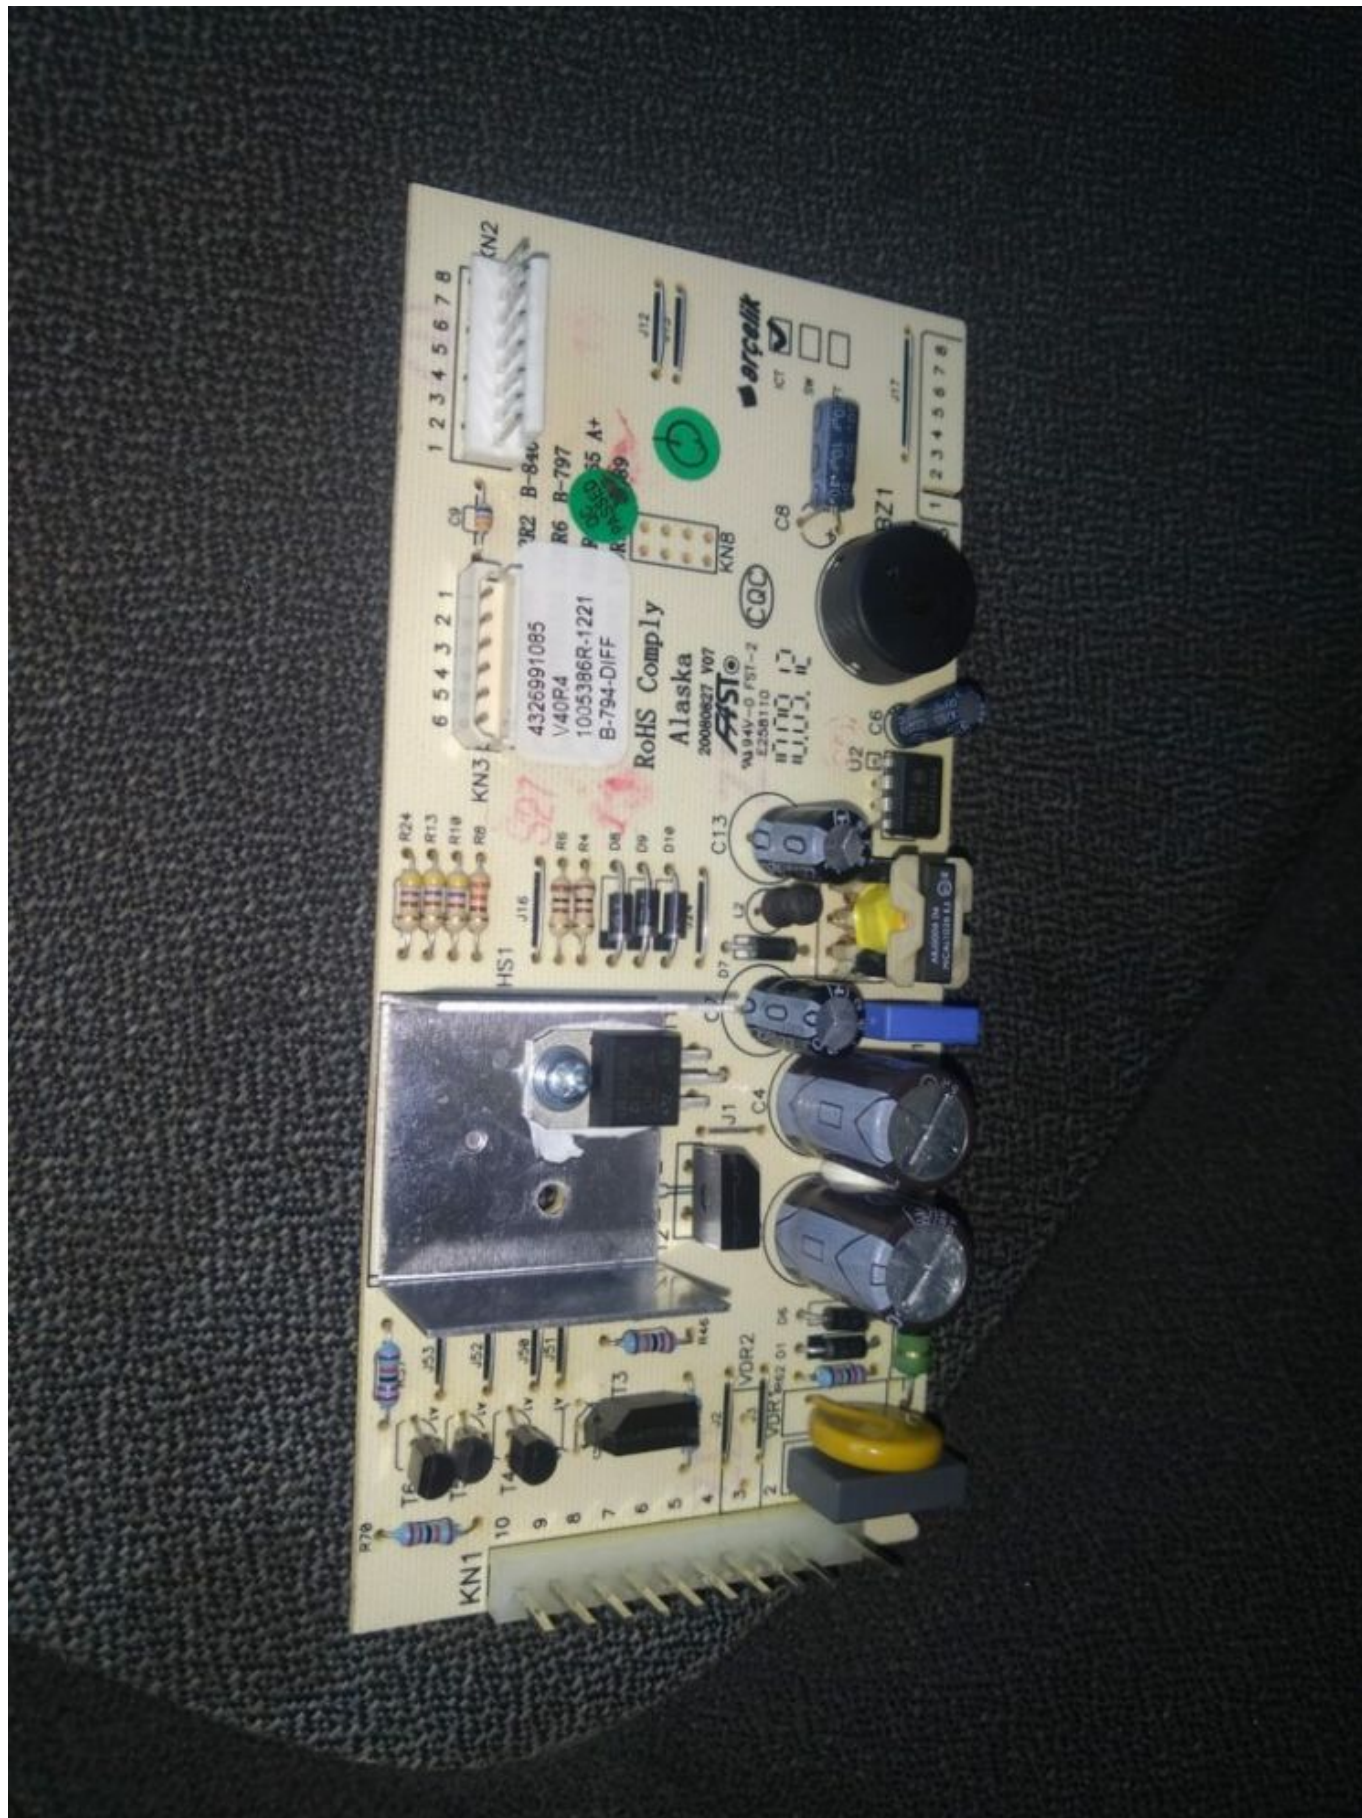

Secure your food.

Carry out a 24-hour defrost with the doors open and the appliance disconnected. Everything should be back to normal. If this problem recurs often, it will be necessary to look into the defrost resistance, or even its operation.

Note: At the same time; take advantage of this intervention to clean the rear part of the motor and the Stock fan from dust.

F4: If the defrost time is equal to the maximum defrost time of 60 min. for 3 consecutive defrosts, this error is indicated. The control performs defrost heating normally.

Cordially.

BEKO

Serial Number: 1010190212

CE  Made In Turkey

Product Number	7240246813	Voltage	220/240 V
Model No	CNE50520DE	Frequency	50 Hz
Climatic Class	T	Wattage	160 W
Type	I	Current	0.80 A
Total Gross Volume	500 l	Defrost Power	180 W
		Refrigerant Type	R 600 a
		Refrigerant Charge	56 g
Freezing Capacity	6 kg/24 h	Conservation Time From Failure	24 h
