Wise Auto Shutdown Free Download

Free PC Logoff/Sleep/Shutdown Tool

Shut your PC down with this convenient and automatic PC shutdown to

Schedule Your PC to Shut Down, Reboot, Log Off Or Sleep

Wise Auto Shutdown enables you to set the PC to shut down, restart, power off, log off, sleep or hibernate on a regular basis or only once, at a specific time. It makes your power management much easier and more convenient.

Schedule The Tasks At Any Time You Want

With Wise Auto Shutdown, you can schedule the task to be executed daily, at an exact time, on a certain date and time or after an amount of time you set manually passes from the moment when the task is set active. You can enable reminders so you will be notified 5 minutes before it executes the task. If you have unfinished business by then, you can delay the task by 10 minutes or up to 4 hours.

Concise And Effective User Interface

Interface of Wise Auto Shutdown can't be any simpler. There are no menus, no complicated options or dialog boxes. It is clearly divided into two panels. You

can easily select which task you want to preform on the left and specify time
when you want that task to be executed on the right, then start the task. You
can get the hang of it in seconds.

Silent Running Mode

When a task starts, Wise Auto Shutdown will minimize in the system tray and run
silently in the background. if you right-click on its icon, the menu that
appears will allow you to immediately reboot or shut down the computer, with a
single mouse click.

Low CPU Usage & Perfectly Compatible with Almost All Windows Versions

Wise Auto Shutdown is completely free. It requires a pretty low quantity of CPU
and system memory. It has been developed and fully tested to work great on
Windows 8&8.1 and other Windows operating systems(both 64 and 32-bit), from
Windows XP and up. No matter what you own — a desktop or a laptop.
