FRESHNESS MATTERS

REFRIGERATOR

REFRIGERATOR

TOSHIBA

18°C

3 System

OriginFR

The TOSHIBA refrigerator is not only a tool to keep fresh, but also a window to open the relation of home life and nature. Through the refrigerator, people can pick taste of nature, and wander the desired natural mysterious realm.

ESHTM

ADVANCED TECHNOLOGIES

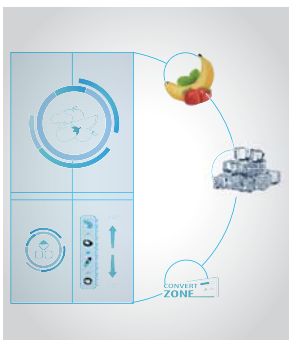

PLASMA⁺ o°e PURE

Plasma pure compartment produce ions and electrons which can make germs losing biological activity, an adsorption odor and fresh cooling air to keep food fresh longer.

AlloyCooling™

Alloy cooling on the back of the refrigerator dissipates heat faster, uniformly cooling the fridge at a faster rate.

3TM SYSTEM

Japanese Quality 3system™ refrigerator powered by toshiba Real INVERTER has 3 independent cooling systems that works independently to deliver the right amount of cold air for each unit without cross-contamination. The result is food that has a significantly longer shelf life, while maintaining the same moisture content, color and shape as the day the food was bought!

TEMP-HUMI CONTROL

Temp-Humi Control makes your life more convenient with TOSHIBA. It can keep food always in freshness by accurate temperature and humidity control. For different kinds of food, it provides the most suitable way to store it which can ensure the freshness at your hand all the time.

MOISTURE ZONE

FLEXIBLE ZONE

MULTI-DOOR

TOSHIBA

26 Compartments

A true family fridge, 26 compartments means there's more room for that one big weekly shop, 30% more than comparable fridges on the market.

1 Door rack easy to move

2 Big Crisper for more storage

3 Easy to get frozen food

4 Independent space for special storage

5 Covert zone

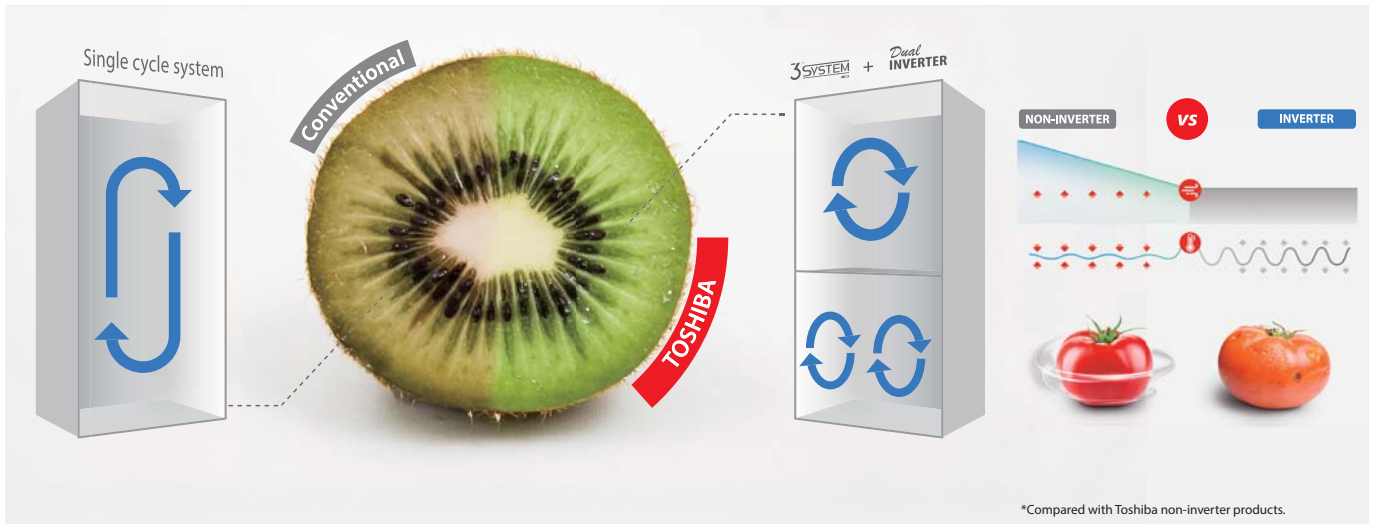

6 Increase 6 racks in bottom doors

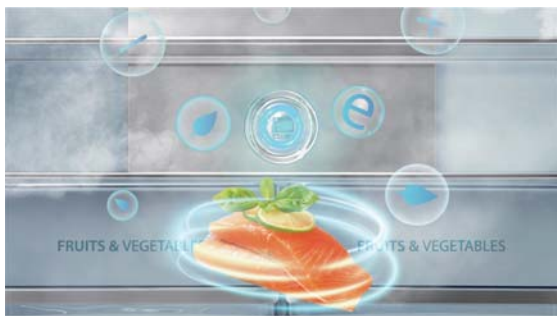

Switch, As you wish

The flex zone with temperature setting from **-18 to 7°C**, can store vegetable, fruit, fish and meat within the same space.

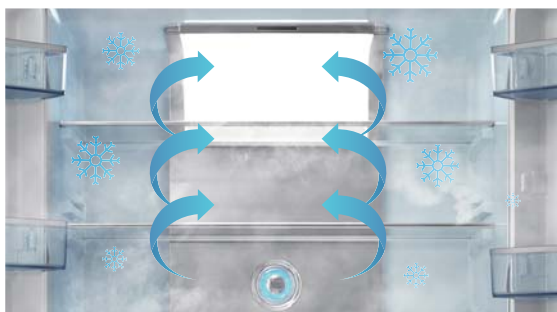

3 SYSTEM™ independent cooling system / Dual INVERTER with energy saving

Japanese Quality 3 System refrigerator powered by Toshiba Dual INVERTER has 3 independent cooling systems that deliver the right amount of cold air for each unit without cross-contamination. The result is that food has a significantly longer shelflife, while maintaining the same moisture content, color and shape as the day the food was bought!

PLASMA PURE sterilization technology

Plasma pure produces ions and electrons which can kill bacteria, neutralize odors, and purify cool air to keep food fresh longer.

AlloyCooling back

360° Alloy cooling lowers temperature much faster, evenly cooling fridge at a faster rate.

LED Curved surface LED light

LED light brightens up softly when you open the door, illuminate the interior and making your eyes comfortable.

1+3 MODE

1+3 MODE for different lifestyle

-  **Whole Fresh**
Usage scenario: Parties, family meals, summer freezer are larger.
-  **Top Off + Bottom Freeze**
Usage scenario: Daily life mode.
-  **Top Off + Bottom Fresh**
Usage scenario: No need for frozen food.
-  **Top Off + Bottom Freeze**
Usage scenario: No need to refrigerate food.

Humidity Control Crisper

HIGH

 Suitable for storing foods that dehydrate quickly.

MED

 Suitable for storing foods with medium humidity requirements, like fruit.

LOW

 Suitable for storing foods with low humidity requirements.

Dual Inverter with energy saving

Not only compressor inverter and fan inverters. Fast cooling and freezing with less energy consumption.

Dual Radar Sensors

Radar sensors automatically perceive the differences in food temperature, independently adjusting temperature inside, and preventing excessive temperature fluctuations.

Smart Control with Digital Panel
Water Dispenser

Inner Pure health water tank

The fridge comes with a large water tank connected to the ice and water dispensers, which can be easily installed anywhere without having to worry about installing pipes. The water tank is equipped with a water filter.

3-In-1 Auto Ice Maker

Automatic Ice & Water Dispenser with 3 modes, Ice water, Crushed ice and Ice cube.

TOSHIBA

SIDE-BY-SIDE

MAX-HUMID-FRESH

Equipped with Mist Charge Unit (ミストチャージユニット) moisture permeable film, which is Toshiba patented technology, keeps the humidity rate at about 90% in the crisper.

Only the humidity of cold air flow is transported to the crisper via the unit film, and is not released when the humidity rate is below 90%.

Constant high humidity, care for the vitality of fruits and vegetables.

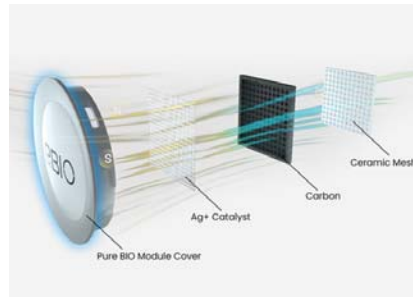

Dual AlloyCooling™

Compared with plastic, metal has a good performance of keeping cold temperature, because of its better thermal conductivity.

Dual Alloy Cooling in both fridge and freezer compartments, achieve faster cooling and better performance of keeping temperature.

- Even cooling
- Cool down faster and more stable
- More delicate (with metal texture)

PURE BIO

Toshiba Pure BIO, honeycomb ceramics, absorbs unwanted smell efficiently and keeps fresh longer.

Pure BIO can dilute the inside ethylene concentration, reduce bacteria rate, slow down the ripening and rotting process.

- Sterilization and deodorization rate 99.9%*
- Ag+ ion catalyst
- Reused after sun exposure

ORIGIN INVERTER™

Both the compressor and fans are inverter. The fan automatically senses changes in the cooling capacity of the compressor and adjusts speed in 4 levels.

High Speed: Efficient cooling, longer freshness.

The fan can automatically speed up and cool down quickly.

Low Speed: Energy-saving, environmentally friendly.

The energy-saving capacity is increased by 17%*.

HUMIDITY CONTROL

In addition to the Max-humidity fresh drawer, myc6 is also equipped with a normal humidity-adjustable crisper. Convenient to store large amounts of fruits and vegetables.

leaf vegetables > fruit vegetables > root vegetables
Humidity Ratio

Separate Preservation

3+3 drawers in the fridge and freezer compartment make separate storage for diverse food.

"1+1" half-deep drawer and "2+2" full-deep drawer provide more space and more storage.

Removable ice twist

The ice twist is removable, can be placed at any location in the refrigerator as needed. Users can get ice cubes easily by push the button down.

Design Award

The extremely detailed Japanese aesthetic design has won four design awards.

Free Position

Boxes can be easily pulled out when the door is open at 90°. Easy to place refrigerator against wall and freely placed in any corner of the house.

Warm Ambient Light

Warm yellow as the exclusive color is used for the refrigerator decoration, bringing warmth to the home environment through light interaction. From this, the product is endowed with emotional meaning and aesthetic experience.

1. The breathing lamp with warm light means "new day", which echoes with Goodnight Candlelight from inside to outside.
2. The soft light gradually changes as being lit and is scattered on the door body through the wave texture, adding a comfortable atmosphere.

Minimalistic Design

White matte is used as the main tone of the interior, and makes contrast with aluminum alloy material on some parts, to form a decorative effect.

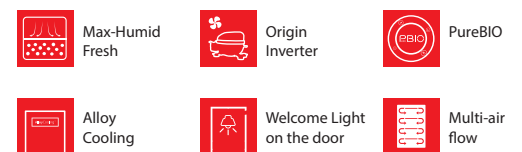

- 1 The combination of fine frosted matte glass and metal gives the interior better high quality feeling.
- 2 The cover plate of atomized moisturizing drawer adopts vertical stripe design, adding the texture style of Japanese sense of order and highlighting the position of selling points. MAX-HUMID FRESH
- 3 White opaque drawer design hides stored food, making the refrigerator more tidy from the appearance.

GR-RS780WE-PGY(22)

Specification

Load Capacity:	48 Units (40HQ)
Material Opinions:	Black Glass

TWO DOOR

TOSHIBA

AirFALL Cooling

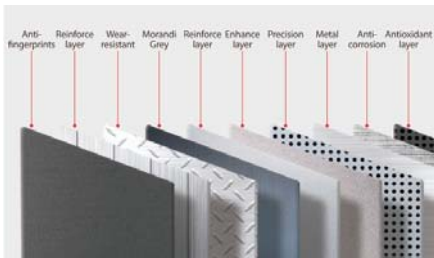

There are air outlets under the cooling zone in the fridge, which is called **AirFALL Cooling** technology. It makes even chilling for food items from 2 sides (back and front), and lower temp in door bins. The food inside seems to be in Natural Encircle Air-Flow, so as to make even and more stable internal temperature, and keep food fresh longer.

Humidity Control

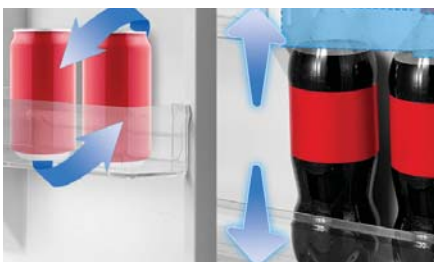

Two levels of adjustment make the **Humidity Control** range up from 60% ~ 80%, to customize storage space for food.

Morandi Gray

The 10-layer panel is made with different functions leading to anti-scratch and anti-fingerprints.

Adjustable Door Racks

By changing or removing the position of the door racks, it can flexibly store big and small items according to your needs.

Origin Inverter

Inverter Compressor + Inverter Fan
Both the compressor and the fan are inverter. The fan automatically sensed the change of the cooling capacity of the compressor and changed speed in 4 levels, improving cooling efficiency and energy saving by 17%*

*Data is from Midea Lab.

Cooling Zone

Cooling Zone is more suitable for storing seafood and meat, which can be achieved at **low temperature (-1°C ~ 1°C)** to keep the meat fresh and not frozen.

Easy-Tap Water Dispenser

Tap on the panel to get cooled water without opening the door.

Electronic Control

One-key electronic temperature control achieves convenient touch control and precise temperature control, and Super Cool function ensures rapid cooling in a short time.

Pure BIO

Toshiba **TMF Pure BIO** is made of honeycomb ceramics, which is plated with Ag+ ion catalyst. The sterilization and deodorization rate is up to **99.9%***.

*Data is from Midea Lab.

Japanese Weave Design

Handle integrates exquisite Japanese weave design

- Integration with Japanese appearance
- Resistance to scratching
- Diamond cutting technology with bottle-framed shape

LED Light

Focus on detailed design, wide irradiation range, you can clearly see the fresh food in the refrigerator.

TWO DOOR BOTTOM MOUNTED FREEZER

TOSHIBA

Easy-Tap Water Dispenser

Tap on the panel to get cooled water without opening the door.

One-piece metallic appearance style design, extremely elegant and durable.

Safe desogm with child lock.

- Upgraded water tank with laser dull polish tech, high quality and durable.
- Water tank can be removed easily, more convenient for cleaning.
- BPA free, safely drinking.

FLEX-ZONE

FLEX-ZONE creates a lower temperature (-1-0°C) compartment in fridge special for meat preservation. No need to defrost, easy to cut when cooking. Reduces flavor changing and nutrition loss.

Origin Inverter

Both the compressor and fans are inverter. The inverter fan automatically adjusts speed in **4** levels.

- High Speed: speed up and cool down quickly
- Low Speed: Energy saving by **17%***

Pure BIO

Toshiba **TMF Pure BIO** is made of honeycomb ceramics, which is plated with Ag+ ion catalyst. The sterilization and deodorization rate is up to **99.9%***.
